

Thanks to our workers at the U.S. Army Deseret Chemical Depot and the Tooele Chemical Agent Disposal Facility...

One Million Chemical Weapons Have Now Been Destroyed

...creating a safer tomorrow for our environment.

Because Tooele's stockpile is the largest with more than one million munitions, no other U.S. Army chemical weapons disposal facility will achieve this important milestone!

With top-notch expertise, environmental stewardship and dedication, our civilians, contractors and Soldiers here continue to safely destroy the Deseret Chemical Depot chemical weapons stockpile.

Congratulations to our workers, who are a valuable asset to the U.S. Army Chemical Materials Agency's chemical disposal program and the citizens we serve.
